

AQUALISA

PRESS RELEASE

September 2010

Über-Showering from Aqualisa's NEW ilux Ultimate & HiQu Ultimate

Take a shower such as Aqualisa's HiQu or ilux Digital and it's hard to imagine how it could be improved upon. After all, these are showers that offer perfect flow and thermostatic temperatures as a matter of course. Features including remote control, an LED display that indicates when the water has reached your pre-set temperature and easy-peasy, push-button functionality come as standard. And did we mention the styling? Sleek, contemporary good looks that have been intelligently designed to complement any bathroom – no matter its shape or size.

But, as with most things, a nip, tuck and spot of fine-tuning can create extraordinary results. And, if you're the type who literally likes their shower to blow them away in the morning, then look no further than ilux Ultimate or HiQu Ultimate, because these showers really do live up to their name.

Both ilux Ultimate and HiQu Ultimate use Aqualisa's standard digital processor, but deliver their super-charged performance thanks to the addition of a powerful, 3.4 bar pump. Achieving the same 'deluge' effect as if a water tank was raised 34 metres above the showering area, the showers are not only for those intent on an early morning blast. They are also the perfect solution for those wanting to create a spa-style shower – e.g. with multiple outlets that might include a main showerhead and handshower – but who are struggling with the constraints of a gravity-fed plumbing system and/or complicated pipework that can restrict flow.

Bringing together the very best in digital and pump technology, the introduction of ilux Ultimate and HiQu Ultimate mean that virtually all home installations – even those working on gravity systems can enjoy a truly exceptional showering experience.

ilux Ultimate & HiQu Ultimate

- Enjoy extreme showering with supercharged flow and pressure
- Indulge in a multi-outlet shower without compromising performance – even with a gravity-fed plumbing system
- Overcome the restrictions of older, complicated pipework that can limit flow and pressure
- Wide range of shower configurations – choose from an exposed or concealed control, a wall, ceiling or height adjustable showerhead, add a useful handshower or opt for remote control – the choice is yours
- 3 year guarantee
- Complete Ultimate product packages start from £1156.00 inc VAT
- For stockist information, visit www.aqualisa.co.uk or telephone 01959 560010
